Hi. I am Julia Eickmeier. I'm residing at the Alton Mental Health Center on an order of protection case from LaSalle County, Illinois. They have tried to Kill me after opting to operate our cases on cult standards where they have permission to Kill me if I interfere with their religion. My child Madeline Hope Kramer was taken away from me and put in their sex cult of some Kind stemming from the Illinois, Valley. I had offered to take care of my child and instead they wanted to harm her so they tried to Kill me because I stood in their way of it or something. If I had Known that Kevin Kramer was in a cult of some Kind, I would have never had a Kid with him in the first place. I saw nothing coming until as of recent where I was picked up on an order of protection violation and they threw me in jail where they then tried to Kill me. The order of protection was false and labled the Family case so that they could operate the o.p. case on cult standards as they have my childs name in that case listed as Connor Lee Robbins, and her real name is Madeline Hope Kramer. This was so that they could Kill me if the situation ever arised so that they could get away with their crimes and what was going on with my daughter. I had second guessed the death threats at first as the Father had threatened to Kill me multiple times and a Chicago Illinois private investigator said he had two graves dug already for us, one for me and one for the child after they were done abusing her or whatever. *The Dad told me things like he was planning my grave, my death bed appointment, that he was posessed and spirits were making him say and do these things. He had a music group called Egons Unicat which members told of how he had plans to murder me, them even threatening me themselves at one time. The Father alleged he was going to take a knife and slash my throat in my sleep, whilst Kicking me one time when sleeping together. He then took pictures with this knife and wrote songs about where he would carry out the murder of me, because he "smelled the blood of an innocent, he claimed. The music written dates back to 2013, songs called wild child and more, some written not produced. *The child was abused by him very early on after the pregnancy and he could have fooled me because I was not prepared for any of this prior to having the child because he is in a band called, Ahymnsa, which means the opposite of violence, according to sanskrit and hinduism, so he claimed, so I thought he was a really decent guy at first. Then things began to go awry as we approached the labor of her as he told me he was in a cult and his Mom planned on taking my child from me. He Narcassisticaly and psychopathicaly threatened us both, claiming to harm himself in the process as well, making me afraid for both our safety. The Dad threatened to commit suicide one time alleging it was because he didn't want to pay child support or have a Kid. I reported these things to the local DCFS agency who collaborated with police to have her taken from me and thrown in a sex ring of some Kind. She appears marked and bruised in some pictures in an evidence file I sent to Chicago psychologist, Mr. Mike Fields who arbitrated on my behalf during this entire process until as of recent because I had to let my attorney go due to him collaborating with them to have my daughter taken from me instead of returned to safety. They were abusing her by allowing this type of stuff to go on, so instead of going forward with trial, the case was dragged on allowing abuse to her on multiple occassions where she could have died. I had a small place in Peru, Illinois where I had several people come to murder me, alleging they had been paid off by local politicians to carry through with murdering me. One time I was chased in my vehicle by a motorcyclist who chased me and was apparently outside my house waiting for me after I left. He claimed to have been part of a motorcycle club and told police not tr

he was after me for blood, Donald Redd was his name. A dog shop was put outside my house with ten and two advertised to insinuate a kill mission by local clan members. An apple seed store was implemented next to the Fathers house to indicate where the location of child rape was occuring. She was said to have been entered into a sex cult according to Chicago private investigator, because she has blonde hair and blue eyes or because she belonged to the Father or something along those lines. Apparently the Father had been in trouble with the law before and was trying to cover something up by working with the police this corruptly. He wrote a song called pimp and police dating back before I knew him which insinuated a cult or something with the police he was involved with. An Attorney of mine, Eric MisKell told of how he was on the online local pedophile club website with cult ties to other masonic and demonic cults that he used for musical powers and explained this is where we were going with my court case and appears to be why he left or took so long because he was afraid for his life due to cult involvement or was in the cult himself and just couldnt tell me. He did ask me to go to the local synogague to take pictures of the Father for our court evidence file but I was afraid they would kill me so I took my bible to his office with me from then on and it scared him away apparantly. He took a leave of absence from the case and then I was prosecuted for an order of protection violation where they took me to the LaSalle County Jail on a false charge, saying I violated the wrong O.P. when I did not, in effort to make it the cult case so they could kill me while I was in jail. In that jail there they had administered noxious gas to mein several rooms, one where I moved to, to escape the first one by threatening to kill myself which is how the mental health crisis got started. They poisoned my food and this carried through to the Alton Mental Health Center where I am waiting to be deemed fit to stand trial so they can send me back to the LaSalle County Jail where they can follow through with murdering me when I get back if they dont prosecute the case correctly and they probably wont since they havent already which created nothing but problems for me. I weighed 98 lbs when I got to the Alton Mental Health Center from LaSalle County, Illinois because of how they weren't letting me eat any foods at all unless they were poisoned which I could have died from and almost did on multiple occassions when I first tried them. I now sit here at the Alton MHC in fear of my safety because they are trying the same thing here, but in lesser form, far lesser form. If I had to pick between the two, I would choose to stay here at the Alton MHC because of how I can at least get food from a few of the other females, which is why I believe they want to send me back and forgive letting me stay here as I've asked, to let my potential charges drop naturally on time served. I already avoid the foods here like the plague and they claim they are sending me back to the LaSalle county jail from not eating the foods here which like I said are porsoned, They claim I am not adhering to the program they have for me by denying the foods which are poisored. They are deeming me fit to stand trial without a regular diet so I can be sent back to the jail so I can starve even more as I wouldnt be able to get food from any other females there. I fear I would drop down to 80 lbs then because I'm not willing to take any risks with my life by trying the poison food they have for me. I would not even try it at this point in time and would resort to eating my own feeal matter and urine as I did before which already caused a significant amount

of health problems for me and I'm unable to attain medical services here because of their deliberate efforts to harm/slaughter me for their friends in LaSalle County apparently. Tonight there was a nurse standing by my tray at meal time with it set aside and the lid off with poisons all over it, looking different than the other trays to apparently intimidate me and cause me fear. This morning the toothpaste was gone from my bin and they were bantering on and on about whether I brushed my teeth or not, in attempts to harass me. next I fear they will poison the shampoo and conditioner I use. I am getting sick of this so decided to call you this evening and obtained the mailing adress to send you a letter. This is what has gone on and taken place and will take place in the near future. If you have any questions at all, you can contact me at the Alton Mental Health Center by phone, mail or if you're willing, I can accept visitors and put you on my contact list if necessary. visiting hours are weekdays from 6-8 pm + weekends and holidays from 1-4:30 pm. please contact me at: Alton Mental Health Center, or you can contact my social worker at 4500 College Avenue Alton, IL 62002 1( ) Brian Alterbridge. 1( ) He may be able to supply you with information about our contacting each other in the situation if we do one there

Thankyou so much, please bring sunglasses as I can eat from the vending machine there and can hardly see and would like that very much.

Sincerely,
Julia Christyne Eckmeier.
